

**PATIENT**

Eden Cicala

**SPECIES**

Canine

**BREED**

Spaniel Mix

**SEX**

Female Spayed

**AGE**

~9 years

**WEIGHT**

22.6lbs

**INTERPRETED BY**

Maggie Machen  
Lamy, DVM  
DACVIM (Cardiology)

**IMAGING**

**PERFORMED BY**

Pamela Harrigan,  
RDCS

**HOSPITAL NAME**

Mass Veterinary  
Specialty Services

**REFERRING VET**

Dr. Masloski

**INVOICE**

21497

**DATE**

10/13/21

**PRESENTING CLINICAL SIGNS**

History: Recheck echo. History chronic valvular disease - Stage B1. Current presentation: Recent increased coughing that responded to antibiotic tx. Currently no cough. She is doing well otherwise with a normal appetite and activity level. CV/RESP: NSR, grade II/IV/VI murmur with PMI left apical area and mild radiation to right, PSS, lung fields clear. BP: 100-105 mmHg. No cardiac medications. \*No sedation for study.  
-Pertinent previous echo findings (11/23/20 MML): LA 1.9 cm; LA:Ao 1.2; LV 3.05 cm; mild LAE; mild MR; mild TR (2.2 m/s).

**ECHOCARDIOGRAM FINDINGS**

2D, m-mode, color flow and Doppler imaging is available.

**Left ventricle:** The LV diameter is normal with adequate myocardial function. LV wall thicknesses are normal.

**Left atrium:** The left atrium is mildly dilated.

**Mitral valve:** The mitral valve is mildly thickened with minimal prolapse into the left atrial lumen. Mild to moderate eccentric mitral regurgitation with a normal velocity.

**Aortic valve/aorta:** The aortic valve is normal in morphology and mobility. Normal aortic outflow velocity; laminar flow. No aortic insufficiency.

**Right ventricle:** Normal right ventricular diameter and morphology indicating no overt evidence of pulmonary arterial hypertension.

**Right atrium:** Normal RA dimension.

**Tricuspid valve:** The tricuspid valve appears normal with mild tricuspid regurgitation; normal velocity.

**Pulmonic valve/pulmonary artery:** The pulmonic valve is normal in morphology and mobility. No pulmonic insufficiency. Normal RVOT velocity; laminar flow.

**Pericardium/other:** No pericardial or pleural effusion noted. No obvious cardiac masses.

**Heart rhythm:** ECG reveals a sinus rhythm with an average HR of 130bpm.

**2-Dimensional Measurements**

Ao diam (cm)	1.6
LA diam (cm)	2.1
LA:Ao (Swe)	1.4
IVS thickness (cm)	0.8
LVID diastole (cm)	3.2
PW thickness (cm)	0.8
LVID systole (cm)	1.8
FS (%)	43

**Doppler Measurements**

PV Vmax (m/s)	0.72
AoV Vmax (m/s)	1.2
MR Vmax (m/s)	5.4
TR Vmax (m/s)	2.2
TR PG (mmHg)	20

**INTERPRETATION OF THE FINDINGS**

Chronic degenerative valve disease persists without evidence of significant progression. The left heart dimensions are stable, and no additional issues are identified.

Continue assessment of progression in the future will help predict long term prognosis, which remains highly variable at this stage (B1).

**RECOMMENDATIONS**

- Given these findings, no cardiac medications are clearly indicated.
- Omega fatty acid supplementation and mild salt restriction may be of some long-term benefit.

- Anesthetic risk is considered mild if needed. Cardiac protective drug choices (opioid/benzodiazepine premedication, propofol or alfaxalone induction, isoflurane gas) are recommended. Pre-oxygenate for 5-10 minutes prior to induction. Monitor for arrhythmias, hypotension, and hypoxia both intra and post-operatively and intervene as necessary. Mild IV fluid restriction is recommended to avoid fluid overload. Avoid heart rate stimulating drugs such as atropine unless clinically indicated.
- Monitor for development of a cough, labored breathing, exercise intolerance or collapse episodes.

**PLAN**

- Recommend conservative monitoring with a recheck echocardiogram in 6-12 months, sooner if any development of clinical signs.

**IMAGES**

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. This report was generated using transcription software, and minor dictation errors may be present. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance, please contact me.
