

PATIENT

Brutus Suto

PRESENTING CLINICAL SIGNS

History: Arrhythmia.
Pertinent previous echo findings (EL 11/3/22): Normal echo.

SPECIES

Canine

BREED

Dachshund

SEX

Male Neutered

AGE

11 years

WEIGHT

19 lbs

INTERPRETED BY

Maggie Machen Lamy,
DVM, DACVIM
(Cardiology)

IMAGING PERFORMED BY

HOLTER MONITOR FINDINGS AND RHYTHM ASSESSMENT

Time analyzed	22:07h
Mean heart rate	97bpm
Maximum heart rate	216bpm
Minimum heart rate	48bpm
VPCs	8 singles
APCs	9 singles, 2 pairs

Interpretation: Underlying normal sinus rhythm with appropriate rate variation. Max HR appears sinus in origin although does not correlate with diary. Isolated VPCs and APCs are singles only with low markers of malignancy. No couplets, triplets or runs noted.

Rhythm diagnosis: Sinus rhythm with isolated premature beats.

RECOMMENDATIONS

No significant arrhythmias are seen on this tracing. Occasional premature beats are noted, which are largely hemodynamically insignificant. No runs are seen and the remainder of the tracing is unremarkable.

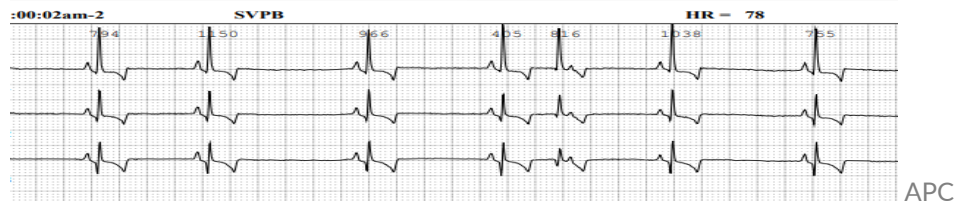

Based upon what is seen here, no indication for cardiac medications. With no structural disease, consider full systemic evaluation to screen for possible contributing causes of ectopic beats (inflammation, neoplasia, etc).

Going forward, recommend reassess an ECG or Holter in 6-12 months, sooner if any lethargy or prolapse develops.
