

PRESENTING CLINICAL SIGNS

History: Gallop sound noted during PE. History of pancreatitis. Rads show a subtle nodule in the right fourth intercostal space. Echo pending.

DATE

12/30/21

ELECTROCARDIOGRAPHIC FINDINGS

A single lead ECG is submitted for review.

PERFORMED BY:

HR: 50=150 bpm
Rhythm: Sinus

Dr. Jennifer Todd

INTERPRETED BY

Normal sinus rhythm, sinus arrhythmia, and sinus tachycardia are all present in this recording. All complex amplitudes and intervals are within normal limits. No premature beats or conduction blocks are seen.

Keith Blass, DVM,
MS, DACVIM
(Cardiology)

ASSESSMENT/RECOMMENDATIONS

Tasha's ECG demonstrates no evidence of a pathologic arrhythmia, as normal sinus rhythm, sinus arrhythmia, and sinus tachycardia are present in the recording. The alternation between these rhythms is likely due to acute variations in autonomic tone.

PATIENT

Tasha Lacroce

No reason for a possible gallop sound is appreciated in this ECG. Common causes of gallops include structural heart disease, systemic hypertension, and age-related decreases in aortic compliance.

SPECIES

Canine

A blood pressure measurement is recommended.

No therapy is recommended based on Tasha's ECG.

BREED

Shepherd/Husky

A recheck ECG is recommended if new physical exam and/or clinical abnormalities suggestive of the presence of a pathologic arrhythmia develop.

SEX

FS

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

AGE

11 y

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
