ASSESSMENT/RECOMMENDATIONS

Normal echocardiogram

BREED

ASH

This examination demonstrates no evidence of structural heart disease. As such, it appears unlikely that there is a cardiac contribution to Luna's cough, and, while there does appear to be a pulmonary infiltrate in her radiographs, it does not appear to be consistent with the presence of cardiogenic pulmonary edema.

SEX

FS

No therapy is recommended based on this exam.

A recheck echocardiogram is recommended if new physical exam and/or clinical abnormalities suggestive of cardiac dysfunction develop.
