

PATIENT

Stella Allen

PRESENTING CLINICAL SIGNS

 History: Recheck echo.
 -Current medications: Vetmedin 2.5mg and 5mg PO q12h.
 -Pertinent previous echo findings (5/2022 MML): mod MR, mod LAE, mild LVE, mild TR, mild PAH; 2.9m/s, LA 3.7, LV 5.5

SPECIES

Canine

ECHOCARDIOGRAM FINDINGS

2D, m-mode, color flow and doppler imaging is available. Diffuse thickening of mitral valve leaflets with no prolapse into the left atrial lumen. Moderate eccentric mitral regurgitation with moderate left atrial dilation. Normal MR velocity. Mild LV dilation with adequate myocardial function. The tricuspid valve appears normal with no tricuspid regurgitation. right atrial and ventricular diameter and morphology. The pulmonic and aortic valves are normal in morphology and mobility. Normal pulmonic and aortic outflow velocities with laminar flow. No obvious aortic or pulmonic insufficiency. No pericardial or pleural effusion noted. No obvious cardiac masses. Premature beats noted throughout.

BREED

Old English Sheepdog

SEX

Female Spayed

AGE

13 years

CARDIAC CHART

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Stable disease is identified in this study. Moderate MR is unchanged, with stable left heart dimensions. Previously noted TR is not visualized; however, the right heart remains normal. Premature beats are noted throughout, and a baseline ECG is recommended. No additional issues are identified.

PATIENT

Stella Allen

Given these findings, continued Pimobendan is indicated in this patient as below. Assessment of progression in the future will help predict long term outcome, however prognosis is guarded at this stage (B2).

SPECIES

Canine

Omega fatty acid supplementation and mild salt restriction may also be of some long-term benefit. Monitor for development of a progressive cough, labored breathing, exercise intolerance or collapse episodes.

BREED

Old English Sheepdog

Anesthetic risk is considered mildly elevated. Cardiac protective drug choices (opioid/benzodiazepine premedication, Propofol or alfaxalone induction, iso or sevo gas) are recommended. Monitor for arrhythmias, hypotension, and hypoxia both intra and post-operatively and intervene as necessary. Judicious IV fluid rates are recommended to avoid fluid overload. Avoid heart rate stimulating drugs such as atropine unless clinically indicated.

SEX

Female Spayed

AGE

13 years

PLAN

Baseline BP and ECG recommended q6mo. Continue heart muscle support Pimobendan 0.25-0.3mg/kg PO q12h.

Recommend monitor for progression with a recheck echocardiogram in 6 months, sooner if any development of clinical signs.

WEIGHT

70.7lbs
