

PATIENT

Moochi Gray

SPECIES

Canine

BREED

Bull Terrier

SEX

FI

AGE

5 y

WEIGHT

40 lb

INTERPRETED BY

Keith Blass, DVM, MS,
DACVIM (Cardiology)

IMAGING PERFORMED BY

Kelly Reschny

HOSPITAL NAME

Hillview VC

REFERRING VET

Dr. Stevenson

INVOICE

DATE

3/20/26

PRESENTING CLINICAL SIGNS

Routine screening. Breeding female.

ELECTROCARDIOGRAPHIC FINDINGS

A six lead ECG is submitted for review.

HR: 166 bpm

Rhythm: Sinus tachycardia

Sinus tachycardia is present throughout this recording. The MEA is normal. All complex amplitudes and intervals are within normal limits. No premature beats or conduction blocks seen.

ASSESSMENT/RECOMMENDATIONS

Normal echocardiogram

This examination demonstrates no abnormalities. As such, no contraindication to breeding Moochi is appreciated in the recording, though consideration can be given to echocardiography to rule out the presence of cardiac disease.

No therapy is recommended based on this exam.

A recheck ECG is recommended if new physical exam and/or clinical abnormalities suggestive of the presence of an arrhythmia develop.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
