

PATIENT

Quincy Walker

PRESENTING CLINICAL SIGNS

History: Grade 4-5/6 murmur. Assess prior to dental.

SPECIES

Canine

ECHOCARDIOGRAM FINDINGS

2D, m-mode, color flow and doppler imaging is available. Diffuse thickening of mitral valve leaflets (anterior>posterior) with minimal prolapse into the left atrial lumen. Severe eccentric mitral regurgitation with moderate left atrial dilation. Normal MR velocity. Mildly increased LV diameter with hyperdynamic myocardial function. The tricuspid valve appears subjectively normal, with trace tricuspid regurgitation. Normal velocity. Normal right atrial and ventricular diameter. The pulmonic and aortic valves are normal in morphology and mobility. Normal pulmonic and aortic outflow velocities. No aortic or pulmonic insufficiency. No pericardial or pleural effusion noted. No cardiac tumors observed.

BREED

Miniature Schnauzer

				50	2.88 (7.1)	6.07 (8.3)	4.46 (7.4)

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Chronic degenerative valve disease causing severe mitral and trace tricuspid regurgitation. Moderate left atrial enlargement indicates there is relatively low risk for imminent complication, however risk for progression to spontaneous congestive heart failure in the future is elevated. No additional issues are identified.

DATE

3/30/23

Given the risk for progression and results of the EPIC trial, Pimobendan is indicated in this patient as below. Additionally, an ACE-I is reasonable pending BP assessment. Assessment of progression in the future will help predict long term outcome; however, prognosis is guarded at this stage (B2).

PATIENT

Quincy Walker

Omega fatty acid supplementation and mild salt restriction may also be of some long term benefit. Monitor for development of a progressive cough, labored breathing, exercise intolerance or collapse episodes.

SPECIES

Canine

Once on the medication for 3-5 days, anesthetic risk is considered **moderately elevated**. Cardiac protective drug choices (opioid/benzodiazepine premedication, Propofol or alfaxalone induction, iso or sevo gas) are recommended. Monitor for arrhythmias, hypotension, and hypoxia both intra and post-operatively and intervene as necessary.

BREED

Miniature Schnauzer

Judicious IV fluid rates are recommended to avoid fluid overload. Avoid heart rate stimulating drugs such as atropine unless clinically indicated.

SEX

Male Intact

PLAN

Institute heart muscle support Pimobendan 0.25-0.3mg/kg PO q12h. Baseline BP recommended, if >150mmHg institute ACE-I 0.5mg/kg PO q12h.

AGE

15 years

Recommend monitor for progression with a recheck echocardiogram in 6 months, sooner if any development of clinical signs.
