

DATE PRESENTING CLINICAL SIGNS

3/1/22

Chronic vomiter but worse lately w/ associated weight loss. Did have a Depomedrol injection on 2/10

CYTOLOGY SUBMISSION

Lymph node

INTERPRETED BY

L.D. McGill, DVM,
Ph.D, DACVP

OBSERVATIONS

Lymph node: Submitted are 9 very good videos of cells collected from the lymph node in SI. The cellularity consists of large numbers of round cells. The round cells are lymphoid cells that are variable in size and shape. Many of the lymphocytes are small mature lymphocytes. There are scattered neutrophils throughout the lymphoid cell collection. There are a few reactive lymphoid cells as well. Atypical lymphoid cells are not overwhelming in the collection.

PATIENT

SI Coast

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Lymph node - Markedly reactive lymphoid tissue with mild chronic suppurative inflammation.

SPECIES COMMENTS

Feline

The cellularity supports chronic inflammation draining to this lymph node. The inflammation could be the result of pancreatitis or enteritis. There is no suggestion of any other specific change. The cellularity is not diagnostic of neoplasia. If problems continue, further evaluation to identify a source for inflammation such as pancreatitis or enteritis is encouraged.
