PRESENTING CLINICAL SIGNS

History: Recheck echo. Stable heart murmur, grade 4/6. Doing well.

- Current medications: Benazepril, Vetmedin (was suggested to discontinue but still currently on).
- Pertinent previous echo findings (8/2022 MML): Mild to moderate MR, mild LAE, no LV. LA: 1.8, LA/AO: 1.4, LV: 2.4.

ECHOCARDIOGRAM FINDINGS

2D, m-mode, color flow and doppler imaging is available. Diffuse thickening of mitral valve leaflets with mild prolapse into the left atrial lumen. Mild eccentric mitral regurgitation with no left atrial dilation. Normal MR velocity. Normal LV diameter with adequate myocardial function. The tricuspid valve appears normal with no tricuspid regurgitation. Normal right atrial and ventricular diameter and morphology indicating no overt evidence of pulmonary arterial hypertension. The pulmonic and aortic valves are normal in morphology and mobility. Normal pulmonic and aortic outflow velocities with laminar flow. No obvious aortic or pulmonic insufficiency. No pericardial or pleural effusion noted. No obvious cardiac masses.

CARDIAC CHART

CANINE CARDIAC PARAMETERS	MR VMAX (m/s)	TR VMAX (m/s)	LA/AO (Boon method)	LA/AO (Heart Base; Swe)	FS (%)	EF (%)	EPSS (cm)
NORMAL PARAMETER	4.5-5.5	<2.7	1.3	<1.6	28-40	40-100	<0.6
PATIENT	5.0	NA	1.4	1.4	50	85	0.1

				40	2.62 (5.2)	5.48 (6.1)	3.96 (5.4)
				50	2.88 (7.1)	6.07 (8.3)	4.46 (7.4)

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Chronic degenerative valve disease persists with overall stability. Mild mitral regurgitation is unchanged with slightly improved left atrial dimension. The LV remains normal, and no additional issues have developed.

As was noted in the previous report, there is no obvious indication for continued medications at this time unless hypertension was noted previously. Assessment of progression in the future will help predict long term prognosis, which is highly variable at this stage (B1). Omega fatty acid

PATIENT

Ziggy Alvarez-Cortez

supplementation and mild salt restriction may be of some long-term benefit. Monitor for development of a cough, labored breathing, exercise intolerance or collapse episodes.

SPECIES

Canine

Anesthetic risk is considered mild if needed. Cardiac protective drug choices (opioid/benzodiazepine premedication, propofol or alfaxalone induction, isoflurane gas) are recommended. Pre-oxygenate for 5-10 minutes prior to induction. Monitor for arrhythmias, hypotension, and hypoxia both intra and post-operatively and intervene as necessary. Mild IV fluid restriction is recommended to avoid fluid overload. Avoid heart rate stimulating drugs such as atropine unless clinically indicated.

BREED

Miniature Poodle Mix

SEX

Male Intact

PLAN

No obvious indication for Pimobendan. Reasonable to continue Benazepril 0.5mg/kg PO q12h.

AGE

14 years

Recommend conservative monitoring with a recheck echocardiogram in 1 year, sooner if any development of clinical signs.

WEIGHT

8.8lbs
