

PATIENT

Achilles Davidsen

SPECIES

Feline

BREED

DSH

SEX

Male Neutered

AGE

7.12.09

WEIGHT

18.75lbs

INTERPRETED BY

Maggie Machen Lamy,
DVM, DACVIM
(Cardiology)

HOSPITAL NAME

Harborside Mobile
Veterinary Clinic

REFERRING VET

Dr. Hawkins

INVOICE

24794

DATE

6.15.22

PRESENTING CLINICAL SIGNS

History: Elevated ProBNP. History of CKD. Littermate had UCM and passed away.

-Pertinent abnormal PE/Chem/CBC/UA Results: Elevated ProBNP.

-Current medications: None.

-Sedation used: Not required to complete full diagnostic ultrasound.

-Pertinent previous ultrasound results: No previous.

-STAT: Not requested

-Imaging performed by: Stephanie Pearce RDCS, RVT.

ECHOCARDIOGRAM FINDINGS

2D, m-mode, color flow and doppler imaging is available. The left ventricular wall is largely normal in dimension with regions of irregularity. The basilar septum measures increased. There is a diffusely hyperechoic endocardium consistent with fibrosis. The endocardium also appears mildly remodeled. The papillary muscles appear mildly remodeled. The left atrium is normal in size. Blood flow through the LVOT appears normal with no evidence of obstruction. The right atrium is normal in size. The right ventricle appears normal. The tricuspid valve appears normal in structure and mobility. Trace tricuspid regurgitation. The mitral valve is normal in structure and mobility with no mitral regurgitation. Blood flow through the RVOT is normal. Trace aortic insufficiency. No evidence of cardiac tumors or metastatic lesions on this scan.

CARDIAC CHART

FELINE CARDIAC PARAMETERS	BODY WEIGHT (kg)	HR (BPM)	IVSd (cm) <small>(Moise, Pipers)</small>	LVIDd (cm) <small>(Moise, Pipers)</small>	LWVd (cm) <small>(Moise, Pipers)</small>	FS (%)	EF (%)
NORMAL PARAMETER	-----	150-240	3.5-0.55	<2 (mean 1.5)	3.5-0.55	35-67	80-100
PATIENT	8.5	NM	0.66	1.69	0.53	54	87
FELINE CARDIAC PARAMETERS	LA/AO <small>(Boon)</small>	LA/AO HEART BASE (Swe) <small>(Abbott)</small>	LA 2D short axis Base view (cm) <small>(Abbott)</small>		LVOT VEL (m/s)	RVOT VEL (m/s)	E max (m/s)
NORMAL	<1.5	<1.3	<1.2		<1.6	<1.3	<0.9
PATIENT	NM	1.2	1.3		1.0	1.3	NM

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The only abnormality appreciated is a focal septal bulge with significant LV remodeling and fibrosis. These findings may be indicative of early hypertrophic pathology or may simply represent a normal variant. Regardless, the left atrial dimension is normal, and there is minimal risk for complication at this time. A small aortic leak is noted, and a baseline blood pressure is strongly recommended.

Given these findings, no medications are indicated at this time.

These findings may or may not explain BNP elevation pending follow up evaluation. Consider alternative contributing causes in this patient, such as kidney disease or hypertension.

If needed, the risk for general anesthesia is low, however heart rate stimulating drugs such as atropine, glycopyrrolate or ketamine should be avoided unless medically necessary. Even without significant pathology, with this degree of remodeling and diastolic stiffening there is a mildly elevated risk for fluid overload in this patient. Judicious IV fluid use is recommended. Additionally, a screening blood pressure is recommended in any older cat prior to general anesthesia.

Risk for complication with steroid use typically follows LA dilation, which in this case is low. That being said, any cat can experience unexpected signs of intolerance and monitoring of RR/RE is advised particularly in the initiation phase.

Recommend recheck echocardiogram in 1 year to screen for any progressive issues.

IMAGES

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. This report was generated using transcription software, and minor dictation errors may be present. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance, please contact me.
