

PRESENTING CLINICAL SIGNS

History: Gallop/split heart sound. ECG revealed possible VPCs. Pre-anesthetic evaluation (neuter).

DATE

8/2/22

ECHOCARDIOGRAPHIC FINDINGS

2D, M-mode, and Doppler study.

PERFORMED BY:

Tom McNeill

INTERPRETED BY

Keith Blass, DVM,
MS, DACVIM
(Cardiology)

PATIENT

Cocoa Haas

Left atrial size is normal. The mitral valve is normal. Left ventricular wall thickness is normal. Left ventricular internal dimensions are normal. Left ventricular systolic function is mildly hyperdynamic. The aorta and aortic valve are normal. Right atrial and right ventricular dimensions are normal. The tricuspid valve is normal. The pulmonary artery and pulmonic valve are normal. No shunting lesions are visualized. No heartworms are visualized. No pericardial effusion or cardiac masses are seen.

LA/Ao - 1.42
IVSd - 4.2 mm
LVPWd - 3.7 mm
LVIDd - 12.8 mm
LVIDs - 5.8 mm
FS - 54.7%
LVOT - 0.48 m/s
RVOT - 0.90 m/s

ASSESSMENT/RECOMMENDATIONS

SPECIES

Feline

This examination demonstrates no evidence of structural heart disease. As such, no reason for Cocoa's gallop/split heart sound is appreciated in the image set.

BREED

Ragdoll

I don't appreciate any VPCs in the submitted ECG, and the ECG software appears to be confusing a sinus tachycardia for a ventricular tachycardia.

Cocoa's cardiovascular risk for general anesthesia is low based on these exams, and there are no contraindications to the use of any anesthetic agents (unless an ECG that was not submitted to me showed the presence of VPCs).

SEX

MI

No therapy is recommended based on these exams.

AGE

6 mo

A recheck echocardiogram is recommended if new physical exam and/or clinical abnormalities suggestive of cardiac dysfunction develop.

WEIGHT

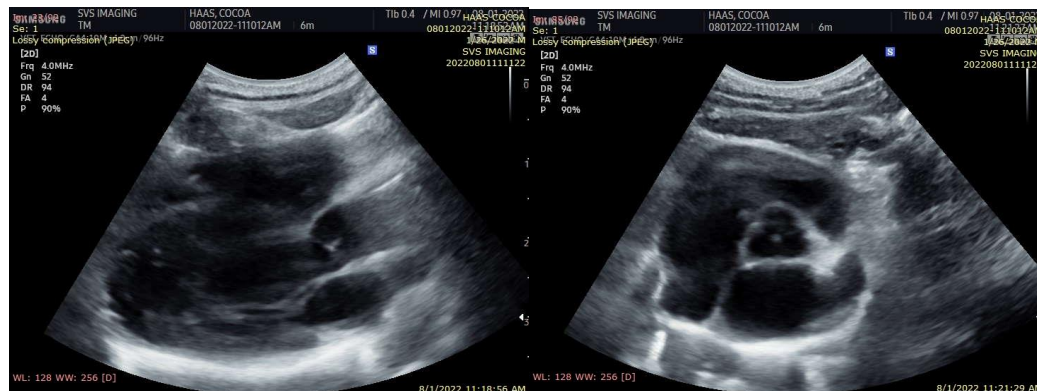

6.98 lb

HOSPITAL NAME

SVS Imaging CT

REFERRING VET

Dr. Sobon

DATE The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

8/2/22

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
