

DATE PRESENTING CLINICAL SIGNS

8/26/22

History: Murmur. Radiographic cardiomegaly. Non-regenerative anemia (PCV 11%). Neutropenic. Coronavirus PCR high titer.

ECHOCARDIOGRAPHIC FINDINGS

PERFORMED BY:

2D, M-mode, and Doppler study.

Dr. Meredith Swart

Left atrial size is normal. The mitral valve is normal. Left ventricular wall thickness is normal. Left ventricular internal dimensions are normal. Left ventricular systolic function is mildly hyperdynamic. The aorta and aortic valve are normal. Right atrial and right ventricular dimensions are normal. The tricuspid valve appears normal, though trace tricuspid regurgitation is present. The pulmonary artery and pulmonic valve are normal. No shunting lesions are visualized. No heartworms are visualized. No pericardial effusion or cardiac masses are seen.

ASSESSMENT/RECOMMENDATIONS

Normal echocardiogram

BREED

This examination demonstrates no evidence of structural heart disease. While a definitive reason for Ella's murmur was not identified, it's likely that her murmur is functional/innocent in nature, as and it's possible that Ella's anemia could be the cause.

DSH

No therapy is recommended based on this exam.

SEX

A recheck echocardiogram is recommended if the characteristics of Ella's murmur change, or if other new physical exam and/or clinical abnormalities suggestive of cardiac dysfunction develop.
