

PATIENT PRESENTING CLINICAL SIGNS

Kylie Dietz Recheck the status from the grass in stomach from the last 2 times.

ULTRASONOGRAPHIC EXAMINATION OF THE ABDOMEN

SPECIES
Urinary System

Canine

The urinary bladder wall is normal in thickness and the mucosal surface is smooth. The bladder lumen is moderately distended with anechoic urine. No masses, inflammatory changes or calculi are observed. Ureteral papillae and visualized portion of the proximal urethra, visible to a depth of 1-2 cm, are normal.

BREED

Boxer

The left kidney is normal size (5.66 cm in length); normal shape and architecture with smooth peripheral margins. There is a normal 1:3 cortex to medulla ratio with normal corticomedullary distinction. There is no evidence of pyelectasia, nephroliths, infarcts or hydronephrosis. Renal vasculature is normal.

SEX

Female

The right kidney is normal size (5.37 cm in length); normal shape and architecture with smooth peripheral margins. There is a normal 1:3 cortex to medulla ratio with normal corticomedullary distinction. There is no evidence of pyelectasia, nephroliths, infarcts or hydronephrosis. Renal vasculature is normal.

AGE

1 Yr.

Adrenal Glands

WEIGHT

64 lbs.

The left adrenal gland is normal size (0.58 cm at cranial pole) (0.47 cm at caudal pole) (2.20 cm in length); normal shape; homogenous parenchyma. The glandular echogenicity and detail are unremarkable. Capsule, cortex, and medullary definition are normal. The phrenicoabdominal vein and surrounding vasculature are normal.

INTERPRETED BY

Andrea Nicastro, DVM,
Diplomate ACVIM
(Small Animal Internal
Medicine)

The right adrenal gland is normal size (0.50 cm at cranial pole) (0.63 cm at caudal pole) (2.14 cm in length); normal shape; homogenous parenchyma. The glandular echogenicity and detail are unremarkable. Capsule, cortex, and medullary definition are normal. The phrenicoabdominal vein and surrounding vasculature are normal.

Spleen

IMAGING PERFORMED BY

Jenn

The spleen is normal in size (2.41 cm in width at the level of the hilus) with a normal capsular contour. There is appropriate echogenicity and echotexture. No focal lesions are observed. Splenic vasculature is normal.

Liver

HOSPITAL NAME

Rockaway

The liver is subjectively normal in size with normal contours and structure. There is appropriate echogenicity and echotexture. No overt structural evidence of inflammatory, infiltrative or regenerative pathology is evident. Vascular and biliary tracts are of normal volume with no evidence of congestion. No pathological hepatic lymphadenopathy observed. The gall bladder lumen is moderately distended. The wall is thin and smooth. Luminal contents are anechoic. The cystic and common bile ducts are normal/not seen.

REFERRING VET

Dr. Maniar

Gastrointestinal

INVOICE

14669

The gastric lumen is mildly distended with soft shadowing material. The gastric wall is normal in thickness with a normal layering pattern. The small intestinal lumen is not dilated. The small intestinal wall thickness is normal with a normal layering pattern and appropriate mural detail. Discreet masses are not identified. The colonic wall is normal.

DATE

3/1/23

PATIENT *Pancreas*

Kylie Dietz The region of the pancreas is isoechoic relative to surrounding omental fat. No obvious parenchymal abnormalities are observed. There is no evidence of regional inflammation or effusion.

SPECIES *Free Abdomen*

Canine The peritoneal cavity is normal. There is no evidence of inflammation or effusion. The abdominal lymph nodes are normal/not visible.

BREED

Boxer

ULTRASONOGRAPHIC FINDINGS

SEX

- Persistent soft shadowing material in the gastric lumen. Change are similar to the previous 2 studies. The shadowing material appears non-obstructive at this time.

Female

AGE

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

1 Yr.

- If the patient remains persistently clinical for gastric foreign material, a gastrotomy with removal of the foreign material may be warranted, particularly if the patient was fasted for this study. Endoscopic removal may prove difficult if the foreign material is grass.
