REFERRING VET

Dr. Rodriguez

INVOICE

69308

DATE

12/3/25

PRESENTING CLINICAL SIGNS

History: ECG prior to anesthesia. Hx of mild subaortic stenosis
Abnormal PE/Chem/CBC/UA Results: Wnl

ECG

There is a single-lead ECG available for review. The underlying rhythm is regular at an average rate of 140bpm. The rhythm appears to be sinus in origin with narrow QRS complexes. There is no atrial or ventricular ectopy and no atrioventricular block identified. This is most consistent with a normal sinus rhythm.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.

Bradley Harris, DVM, DACVECC, DACVIM (cardiology)
