

**PATIENT PRESENTING CLINICAL SIGNS**

June Bauer O was told she was spayed but rescue cannot find records. Appears to be in heat (12/12/21).  
Abnormal PE/Chem/CBC/UA Results: Urine Protein +4, Prot/creat ratio 2.2, PH 8

**SPECIES ULTRASONOGRAPHIC EXAMINATION OF THE ABDOMEN**

Canine

**Urinary System**

**BREED**

Doberman Pinscher

The **urinary bladder**, trigone, and pelvic urethra presented normal thicknesses and normal tone. The ureters were not visible which is normal. No uroliths or sediment were visualized and anechoic urine was present. No evidence of inflammatory or neoplastic changes were noted. Ureteral papillae were normal.

**SEX**

Female

The **kidneys** revealed largely normal size and structure, corticomedullary definition and ratio (cortex 1/3 of medulla) were essentially maintained with some age-related loss of curvilinear patterns regarding the capsule and C/M junction. The cortices presented largely uniform texture with some increased echogenicity expected for his age patient. Medullary structure differed distinctly from that of the cortex and no evidence of pelvic dilation was present. The right kidney measured 7.1 cm. The left kidney measured 6.84 cm.

**AGE**

8 Years

**Adrenal Glands**

**WEIGHT**

57 Pounds

Both **adrenal glands** were visualized and recognized as having normal shape, size, position and echogenicity for this breed. The phrenic vasculature, glandular echogenicity and detail were unremarkable. Capsule, cortex, and medullary definition were normal for this age patient. The right adrenal gland measured 3.18 cm x 0.64 cm at the cranial pole and 0.54 cm at the caudal pole. The left adrenal gland measured 2.88 cm x 0.50 cm at the cranial pole and 0.56 cm at the caudal pole.

**INTERPRETED BY**

Eric Lindquist, DMV  
DABVP, Cert. IVUSS

**Spleen**

The **spleen** presented a smooth homogeneous parenchyma hyperechoic to liver and renal cortical parenchyma. The capsule was smooth without noticeable expansion or deviation from within the spleen or adjacent pathology. The splenic vasculature demonstrated normal volume without signs of congestion or thrombosis. No sonographic evidence of acute or chronic inflammatory, neoplastic, or infarctual changes were noted.

**IMAGING PERFORMED BY**

Shari Reffi, CVT

**Liver**

**HOSPITAL NAME**

Dr. T's Vet Care

The **liver** images submitted revealed subjectively normal liver size, contour, and structure. Parenchymal echogenicity was naturally coarse and hypoechoic to the spleen. Vascular and biliary tracts were of normal volume with no evidence of congestion. The gallbladder presented acceptably thin walls with primarily anechoic content. The cystic and common bile ducts were normal. No pathological hepatic lymphadenopathy was evident. No overt structural evidence of inflammatory, infiltrative or regenerative pathology was evident.

**REFERRING VET**

Dr. Turk

**Gastrointestinal**

**INVOICE**

33640

Examination of the **gastrointestinal tract** revealed a stomach and intestine free of stasis, of normal wall thickness, acceptable curvilinear mural detail, and peristaltic activity. Small and large intestine demonstrated normal luminal chyme and stool consistency respectively. No obstructive or overt infiltrative disease was noted. No associated abnormal lymphatic activity was noted.

**DATE**

12/22/21

**PATIENT**

**Pancreas**

June Bauer

The base and limbs of the **pancreas** were observed to be largely isoechoic to surrounding omental fat. Pancreatic duct and capsular contour were acceptably normal and parenchyma respected normal curvilinear patterns. No overt evidence of active inflammatory or neoplastic disease was noted.

**SPECIES**

Canine

**Free Abdomen**

The left horn of the uterus was dilated at 1.5 cm, consistent with pyometra. Echogenic debris noted within the uterine lumen. The left ovary was uniform at 0.73 cm.

**BREED**

Doberman Pinscher

**ULTRASONOGRAPHIC FINDINGS**

- Pyometra, unremarkable abdomen otherwise

**SEX**

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

Female

Ovariohysterectomy indicated.

**AGE**

8 Years

**WEIGHT**

57 Pounds
