Lego Milletics

SPECIES

Canine

BREED

Dachshund

SEX

Neutered Male

AGE

4 Years

WEIGHT

11.8

INTERPRETED BY

Eric Lindquist, DMV,
DABVP (CFM), Cert.
IVUS

IMAGING PERFORMED BY

Brandon

HOSPITAL NAME

Dillsburg VC

REFERRING VET

Dr. Amber

INVOICE

36166

DATE

3/10/26

PRESENTING CLINICAL SIGNS

History: Repeat images from 3/5/26 study due to stomach contents blocking liver imaging

LIMITED ULTRASONOGRAPHIC EXAMINATION

Liver

The **liver** presented persistent moderately amount of remodeling and moderate to severe microhepatica. The gallbladder and common bile duct were unremarkable. The visible portal vein measured 0.3 cm, which is subnormal in size for this patient, and is strongly suggestive for extrahepatic shunting, however, no shunt was visible in the image set provided.

The upper **gastrointestinal tract** that was visible in this image set was unremarkable, as was the right base of the **pancreas**.

ULTRASONOGRAPHIC FINDINGS

- Hepatic remodeling and microhepatica
- Visible portal vein subnormal in size, strongly suggestive for extrahepatic shunting (no shunt was visible)
- Unremarkable visible GI tract and right base of the pancreas

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Recommend bile acid profile if not already performed and medical management, as well as CT with contrast.

ABOUT SONOPATH CT SERVICES:

SonoPath CT Services are offered at the SonoPath Imaging and Veterinary Education Center, 141 Main St (rt 206), Andover, New Jersey, a 20-minute drive west on route 80/206 North from the route 80/287 interchange/Parsippany, New Jersey. More information can be found at <https://sonopath.com/services/vetimaging/>
