INTERPRETED BY

Eric Lindquist, DMV,
DABVP (CFM), Cert.
IVUSS

IMAGING PERFORMED BY

Jenn

HOSPITAL NAME

Rockaway AH

REFERRING VET

Dr. Maniar

INVOICE

36310

DATE

3/20/26

PRESENTING CLINICAL SIGNS

- Recheck prev u/s 3/17 and 3/18 re checking gallbladder

LIMITED ULTRASONOGRAPHIC EXAMINATION

The liver itself was unremarkable. The gallbladder in this patient was slightly overdistended. A trace amount of sand was noted. Gallbladder dilation could be influenced by the NPO status. This is not to the level of mucocele formation.

ULTRASONOGRAPHIC FINDINGS

- Mild overdistention of the gallbladder with minor sand accumulation

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Recommend continuation of ursodiol in this patient, however, no evidence of emergent disease appears to be present.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
