

PATIENT

Deuce Morgart

SPECIES

Canine

BREED

Cane Corso

SEX

Neutered male

AGE

8 years

WEIGHT

107 lbs

INTERPRETED BY

Eric Lindquist, DMV
DABVP, Cert. IVUSS

IMAGING PERFORMED BY

Dr. Moon

HOSPITAL NAME

Shiloh VH

REFERRING VET

Dr. Owings

INVOICE

PRESENTING CLINICAL SIGNS

History: VPCs found on EKG, intermittent gastrointestinal distress
Abnormal PE/Chem/CBC/UA Results: SDMA 14.5

ULTRASONOGRAPHIC EXAMINATION OF THE ABDOMEN

Urinary System

The **urinary bladder**, trigone, and pelvic urethra presented normal thicknesses and normal tone. The ureters were not visible which is normal. No uroliths or sediment were visualized and anechoic urine was present. No evidence of inflammatory or neoplastic changes was noted. Ureteral papillae were normal.

The **kidneys** revealed normal size and structure, corticomedullary definition and ratio for this age. The cortices presented largely uniform texture with normal echogenic relationship to liver and spleen. Medullary structure differed distinctly from the cortex. The capsules were acceptably uniform without significant irregularities. The right kidney revealed slight pyelectasia. The right kidney measured 6.5 cm and the left kidney measured 6.4 cm.

Adrenal Glands

The left **adrenal gland** was visualized and recognized as having normal shape, size, position and echogenicity for this breed. The phrenic vasculature, glandular echogenicity and detail were unremarkable. Capsule, cortex, and medullary definition were normal for this age patient. The left adrenal gland measured 0.6 cm. The region of the right adrenal gland was imaged with no evidence of pathology.

Spleen

The **spleen** presented a smooth homogeneous parenchyma hyperechoic to liver and renal cortical parenchyma. The capsule was smooth without noticeable expansion or deviation from within the spleen or adjacent pathology. The splenic vasculature demonstrated normal volume without signs of congestion or thrombosis. No sonographic evidence of acute or chronic inflammatory, neoplastic, or infarctual changes was noted.

Liver

The **liver** images submitted revealed subjectively normal liver size, contour, and structure. Parenchymal echogenicity was naturally coarse and hypoechoic to the spleen. Vascular and biliary tracts were of normal volume with no evidence of congestion. The gallbladder presented acceptably thin walls with primarily anechoic content. The cystic and common bile ducts were normal. No pathological hepatic lymphadenopathy was evident. No overt structural evidence of inflammatory, infiltrative or regenerative pathology was evident.

PATIENT

Gastrointestinal

Deuce Morgart

The upper **gastrointestinal tract** was unremarkable, yet some mucosal fogging was noted in the small intestine with some reactive mesentery.

SPECIES

Canine

Pancreas

The base and limbs of the **pancreas** were observed to be largely isoechoic to surrounding omental fat. Pancreatic duct and capsular contour were acceptably normal and parenchyma respected normal curvilinear patterns. No overt evidence of active inflammatory or neoplastic disease was noted.

BREED

Cane Corso

SEX

Neutered male

ULTRASONOGRAPHIC FINDINGS

Mucosal fogging and reactive mesentery consistent with lymphangectasia/inflammatory bowel.

Otherwise, unremarkable abdomen.

AGE

8 years

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

There was no overt cause of VPC's in this patient. Holter monitor and echocardiogram are indicated. Holter monitor can be obtained from our office. Albumin levels should be monitored carefully. Purina HA or Royal Canin HP diet is recommended along with probiotics +/- Metronidazole and anti-parasitic protocol are all valid interventions.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
