

PATIENT PRESENTING CLINICAL SIGNS

Ellie Sanchez Pet had inadvertent access to male and tied Feb 11.

SPECIES LIMITED ULTRASONOGRAPHIC EXAMINATION

Canine The urinary bladder was unremarkable.

BREED The right horn of the uterus present slight luminal fluid. The left horn was uniform and empty. No evidence of pregnancy.

Springer Spaniel

ULTRASONOGRAPHIC FINDINGS

- SEX Slight uterine fluid

Intact Female

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

AGE

Very early pregnancy (less than 18 days) cannot be completely ruled out. However, no overt evidence of fetal growth. Given the reported history, pregnancy is highly unlikely. Active heat cycle or early metritis may be an issue. Recommend ovariohysterectomy if the patient is not destined to be bred.

WEIGHT

17 kg
