PRESENTING CLINICAL SIGNS

History: *P initially seen on 4/19. Per o left the house Sunday around 12:30pm, o was gone from the house between the hours of 1 to 7:30p, in which they came home and observed p in distress. P noted with body tremors, starting with hind legs and then moving full body (described almost as if p was shivering shaking). P lethargic. Owner noted grunting, pain. P had diarrhea in the house today. P has had two prior FB surgeries.

*P represented 12:30 am 4/21. P ate well when she got home Sunday night. She slept for maybe an hour then was panting. Owner noting increased respiratory rate. P noted with increased lethargy. P then noted with hyporexia. admitted for supportive care. overnight after regurgitation, P had respiratory distress event, placed in oxygen.

*concern for gastroenteritis; regurgitation with possible delayed gastric emptying - r/o foreign body, adhesions, gastric motility disorder, gastric outlet obstruction; Respiratory distress with stridor and stertor - r/o aspiration pneumonia, upper airway obstruction, laryngeal paralysis; Possible aspiration pneumonia - r/o bacterial pneumonia, chemical pneumonitis, foreign body aspiration

Abnormal PE/Chem/CBC/UA Results: PE: subtle pain; soft on abdominal palpation--regurgitation after PE overnight: abdomen tense with moderate discomfort on palpation rads: no obvious foreign object or signs of obstruction; numerous hemivertebra; mild aerophagia; (previous foreign object only picked up on AUS) 4/20 CBC: WBCc 17.74 H, neu 15.95 H, glucose 128 H 4/21 cPL: normal

ULTRASONOGRAPHIC EXAMINATION

Complete images of the spleen revealed normal size and contour.

The liver revealed increased portal markings, yet was unremarkable and uniform.

The stomach revealed a 3.2 cm progressively shadowing luminal structure. This occupied the pylorus. No stasis was noted. Small intestinal thickening was noted with minor heterogenous pancreatic changes.

ULTRASONOGRAPHIC FINDINGS

Gastric foreign matter, may be amenable to endoscopy, non-obstructive at the time of the sonogram.

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

I recommend ensuring that the patient was n.p.o. prior to the sonogram.
