

PATIENT

Alice Hecker

SPECIES

Feline

BREED

Domestic Longhair

SEX

Spayed female

AGE

7 years

WEIGHT

4.45 kg

INTERPRETED BY

Eric Lindquist, DMV
DABVP, Cert. IVUSS

IMAGING PERFORMED BY

Dr. Evoniuk

HOSPITAL NAME

State Ave

REFERRING VET

Dr. Evoniuk

INVOICE

46606

DATE

8/14/23

PRESENTING CLINICAL SIGNS

History: Presented last Aug 9, 2023 for annual exam and vaccination Indoor E/D normal, Royal Canin Indoor adult, free fed V/D none C/S - sneezing a lot over the past week and a half, O hasn't seen any discharge L/B none Medications - none PE: Heart Murmur 2/6 Systolic Left Side

ULTRASONOGRAPHIC EXAMINATION OF THE HEART

The echocardiogram in this patient demonstrated normal **left atrial** size based on 3 separate LA measurements. Trivial **mitral** valve turbulence was noted, yet not clinically significant. The **left ventricle** presented normal thicknesses with linear contour and was not dilated nor restricted. The **myocardium** presented normal echogenicity without subjective evidence of significant fibrotic or ischemic disease. **Contractility** of the ventricular walls was adequate and in normal range for this patient evidenced by the fractional shortening measurement and subjective evaluation of the different regions and angles of the myocardium. The **left ventricular outflow** tract demonstrated normal laminar flow and subjective structural integrity. The **right atrium** and auricle revealed normal size, structure and content. No evidence of masses was noted or chamber overload. **Tricuspid** valvular assessment demonstrated adequate linear morphology and kinetics. The **right ventricle** was of normal size (1/3 diameter of LV), chordae structure, myocardial echogenicity and thickness. **Pulmonic** tract assessment revealed normal valve structure, laminar flow, and diameter (approx. 1:1 pa/ao ratio). No visible **pericardial** or free pleura fluid was noted or extra cardiac pathology in the visible planes. The cranial **mediastinum and pericardial regions** were free of masses in the visible window.

FELINE CARDIAC PARAMETERS	BODY WEIGHT (kg)	HR (BPM)	IVSd (cm)	LVIDd (cm)	LVWd (cm)	FS (%)	EF (%)
NORMAL PARAMETER	-----	150-240	0.3-0.6	1.0-2.1	0.25-0.6	35-67	80-100
PATIENT		NM	0.4	1.4	0.45	50

PATIENT

Alice Hecker

ULTRASONOGRAPHIC FINDINGS

Minor mitral valve turbulence.

SPECIES

Feline

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The clinical signs are non-cardiogenic in this patient. No therapy is recommended.
