

<b>PATIENT</b>	<b>PRESENTING CLINICAL SIGNS</b>
Holly Kahn	LIMPING LEFT FRONT LEG ON AND OFF SINCE AUGUST . P HAS BEEN ON JOINT SUPPLEMENT BUT NO IMPROVEMENT . PAIN IS DETECTED IN METACARPAL AREA.
<b>SPECIES</b>	<b>RADIOGRAPHIC STUDY OF HEAD AND FORE PAWS</b>
Canine	Jpg. images only: 1x DV skull including fore legs, 1x cranio-caudal/DP fore legs, R+L lateral fore leg
<b>BREED</b>	<b>RADIOGRAPHIC FINDINGS</b>
Cockapoo	<u>Head</u>  I can see no bony abnormalities associated with the skull or C-spine.
<b>SEX</b>	<u>Paws</u>
Female Spayed	The muscles mass on the foreleg labelled R is reduced in size and opacity on the cranio-caudal/DP views
<b>AGE</b>	Skeletal immaturity compatible with the given age is noted.
11 Years	The bones are well mineralized, have a normal trabecular structure and smooth, continuous surfaces. Cortical-medullary development and differentiation of the long bones are physiological.
<b>INTERPRETED BY</b>	All joints appear congruent with even subchondral bone surfaces. Swelling around the joints is not apparent. A small amount of new bone is present on the distal aspect of the accessory carpal bones.
Heike Rudolf, DVM, Dr. med. Vet., DipECVDI DVR	
<b>HOSPITAL NAME</b>	<b>RADIOGRAPHIC DIAGNOSIS</b>
Tenafly Vet Center	<ul style="list-style-type: none"> <li>• Possible muscle atrophy, right</li> <li>• Accessory carpal bones: originopathy of flexor and abductor muscles</li> </ul>
<b>REFERRING VET</b>	<b>INTERPRETATION OF THE FINDINGS &amp; FURTHER RECOMMENDATIONS</b>
Kyoung Han	I can see no changes on the requested views that would explain the clinical signs. Should the muscle atrophy be real, brachial plexus abnormalities (e.g. inflammation, tumor), tendinopathies as well as myositis should be considered and can be ruled out with cross sectional imaging.
<b>INVOICE</b>	<b>TECHNICAL COMMENTS</b>
48582	Only jpg images were submitted. The transformation from DICOM to jpg reduces the image quality and only allows limited manipulation of the image. More subtle lesions can thus easily be missed. For the best possible imaging reports, I suggest submitting DICOM images in the future.
