PRESENTING CLINICAL SIGNS

Owner requested evaluation of lumbar spine and pelvis. owner wants to rule out any arthritis or joint disease.

RADIOGRAPHIC STUDY OF THE L-SPINE

R/L lateral and VD, totaling four radiographs provided for interpretation.

14.03.2026

RADIOGRAPHIC FINDINGS

Three wire loops are located in the caudo-ventral abdominal wall.

Number and shape of the vertebrae are physiological; their surfaces are smooth. No evidence of osseous destruction or lysis is present along the spine. The facet joints appear physiological.

The L4/5 disc space is slightly narrower than the adjacent ones.

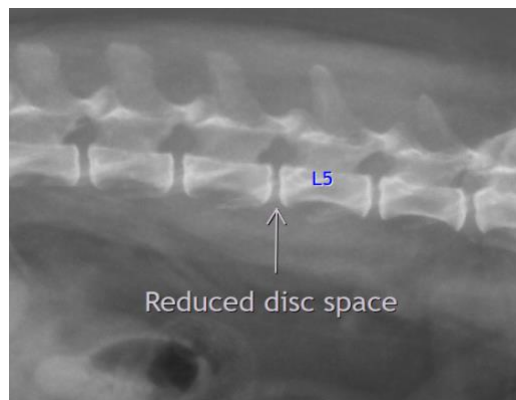

Pelvis and stifles appear within normal limits for the breed.

RADIOGRAPHIC DIAGNOSIS

- L4/5-disc space narrowing
- Incidental finding
- Wire sutures

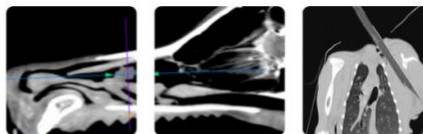

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

Cord compression can only be identified with myelography or in cross-sectional imaging. In case neurological deficits and/or pain unresponsive to medical management develop, CT or MRI is recommended.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance, please contact me.
