Nova Pulino

SPECIES

Canine

BREED

French Bulldog

SEX

F

AGE

4

WEIGHT

24.6

PRESENTING CLINICAL SIGNS

bred 5 weeks ago

Abnormal PE/Chem/CBC/UA Results: Distended abdomen

PREGNANCY CHECK

Multiple viable fetuses present with color Doppler positive assessment of fetal blood flow. An example of fetal body diameter measured 1.88 cm. Evidence of early skeletal mineralization was present.

ULTRASONOGRAPHIC FINDINGS

Primary

- Confirmed pregnancy - multiple viable fetuses present

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

An accurate count of current viable fetuses was not possible. Estimated gestational age based on body diameter and evidence of early skeletal mineralization is ~ 42 to 46 days. Correlation with breeding date recommended.

Abdominal radiographs when appropriate recommended for accurate fetal count. Estimated gestational age is an approximate number.
