Urinary/Reproductive System

The urinary bladder, trigone, cystourethral junction, and visible pelvic urethra to a depth of 2 cm exhibited normal thickness and tone. Anechoic urine was present in the lumen with no uroliths or sediment. The ureteral papillae were normal. The ureters were not visible which is normal. No evidence of inflammatory or neoplastic changes were noted.

Multiple subjectively viable fetuses were present. Normal gravid uterine appearance without evidence of peri uterine pathology or peritoneal free fluid.

Visualized segments of small bowel and visualized colon appear to be sonographically normal.

- Confirmed pregnancy-estimate 3-4 viable fetuses
