PRESENTING CLINICAL SIGNS

P presented for evaluation of inappetence, weight loss, and limping. P has lost 9 pounds within the last month. O's recently traveled via car from Missouri (P and family spend winters in NV). Previous evaluation on 11/04 by regular DVM showed no concerns besides obesity and 3cm, soft mass on the lateral aspect of the left hindlimb (previous FNA showed lipoma).

Abnormal PE/Chem/CBC/UA Results: Subjectively negative Cranial Drawer sign of left stifle Intermittent toe-tapping lameness and difficulty rising on left hindlimb No abdominal discomfort

RADIOGRAPHIC STUDY OF THE STIFLES

Mediolateral views of both stifles and ventrodorsal hip extended view of the pelvis totaling 3 images available for review.

Interpretation of the stifles requested.

RADIOGRAPHIC FINDINGS

Both stifles present within age related normal limits. There is no evidence of articular swelling. No osteoarthritic changes are seen. There is no evidence of subchondral bone defects or aggressive bone lesions.

Note the presence of radiographic changes in the coxofemoral joints which, however, are not part of this report.

There is severe atrophy of the left hind limb musculature.

A fat opaque subcutaneous mass of 3.0 cm length is seen in the proximal lateral left thigh.

RADIOGRAPHIC DIAGNOSIS

- Radiographically normal age related stifle joints.
- Severe atrophy of the left hind limb musculature.
- Subcutaneous lipoma in the proximolateral aspect of the left thigh.

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

No structural changes in the stifles are identified radiographically that would explain the patient's clinical signs. Note the presence of radiographic changes in the coxofemoral joints.

The atrophy of the left hind limb musculature may be secondary to disuse or neurogenic.

PATIENT

Augusta Nichols

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.
