

## PATIENT

Jasper Current

## SPECIES

Canine

## BREED

Labrador Retriever Mix

## SEX

MN

## AGE

3Y, 8M

## WEIGHT

68.4lbs

## INTERPRETED BY

Nele Eley (Ondreka),  
DVM Dr. med. vet.,  
DipECVDI

## IMAGING PERFORMED BY

Allison

## HOSPITAL NAME

Elizabeth Animal  
Hospital

## REFERRING VET

Kim Allyn, DVM

## INVOICE

72873

## DATE

12-4-25

## PRESENTING CLINICAL SIGNS

Vomited some foreign material, doing well otherwise. E/D/A all normal.

## RADIOGRAPHIC STUDY OF THE ABDOMEN

Right/left lateral and ventrodorsal views of the abdomen totaling 3 images available for review.

## RADIOGRAPHIC FINDINGS

The stomach and small intestine present no evidence of radiopaque foreign material. The small intestinal loops appear normal in diameter. A gas pattern within the duodenum is seen. There is no evidence of obstruction or segmental dilation.

The abdominal serosal detail is maintained.

The colon and cecum contain normal fecal material and gas.

A small discrete piece of opaque foreign material is present within the transverse colon without evidence of obstruction.

## RADIOGRAPHIC DIAGNOSIS

- Small nonobstructive foreign material in the colon.
- No evidence of mechanical intestinal obstruction, intussusception, or abnormal dilation.

## INTERPRETATION OF FINDINGS & FURTHER RECOMMENDATIONS

Clinical monitoring is advised. The patient should be observed for signs of vomiting, anorexia, abdominal pain, or lethargy. Follow up ultrasound would be recommended if vomiting persists, clinical signs worsen, or if the patient develops other gastrointestinal symptoms.
