

**PATIENT**

Harley Hayes

**SPECIES**

Canine

**BREED**

Pug Mix

**SEX**

NM

**AGE**

9 Years, 8 Months

**INTERPRETED BY**

Nele Eley, DVM  
Dr. med. Vet. DipECVDI

**HOSPITAL NAME**

DPC Veterinary  
Hospital

**REFERRING VET**

Dr. Rivera

**INVOICE**

51092

**DATE**

3-22-22

**PRESENTING CLINICAL SIGNS**

Rechecking: RF paw History: P presents to recheck RF paw. O states lesion between digit 2-3 has improved but not fully. P will begin to limp when walked for too long. Not currently licking paw excessively but does look irritated. O also wanted some lumps on abdomens double checked. P has two soft lumps in ventral abdomen, noted 3 months ago and O thinks they have slightly grown. P also has a smaller firmer lump over by chest but O believes it has been there for a couple years.

**RADIOGRAPHIC STUDY OF THE FRONT PAWS**

Dorsopalmar view of both front paws and mediolateral view of the right front paw totaling 2 images available for review.

**RADIOGRAPHIC FINDINGS**

Mild diffuse soft tissue swelling of the digital pad of the 3<sup>rd</sup> digit is seen in the right front paw. There is no evidence of aggressive bone lesions, foreign material, or phalangeal arthropathy.

The nails appear to be relatively long but intact.

The carpal joints present within normal limits.

The left front paw presents within normal limits.

**RADIOGRAPHIC DIAGNOSIS**

- Digital pad soft tissue swelling - 3<sup>rd</sup> digit right front paw.

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

Unspecific soft tissue swelling compatible with edema, hematoma, cellulitis, or early neoplasia of the 3<sup>rd</sup> digit is noted in the right front paw. Correlate with the clinical findings and consider sampling for further definition if indicated.
