

**PATIENT**

Marie Dean

**PRESENTING CLINICAL SIGNS**

Hx of vomiting and not eating  
Abnormal PE/Chem/CBC/UA Results: mild abd. discomfort BW: indicated stress leukogram ,  
,dehydration , hyperglycemia elevated GGT, T. Bilirubin

**SPECIES**

Feline

**RADIOGRAPHIC STUDY OF THE ABDOMEN**

Right lateral and ventrodorsal whole body views totaling 2 images available for review.

**BREED**

Siamese

Abdominal read requested.

**RADIOGRAPHIC FINDINGS**

The patient is in thin body condition.

**SEX**

Female Spayed

The radiographic presentation of the kidneys, liver, and urinary bladder is considered within normal limits.

Mild gastric aerophagia is noted. No abnormal gastric content is seen.

**AGE**

2 Years

Part of the small intestinal loops present eccentric gas patterns.

The colon contains a moderate amount of gas and fecal matter.

**INTERPRETED BY**

Nele Eley, DVM  
Dr. med. Vet. DipECVDI

**RADIOGRAPHIC DIAGNOSIS**

- Segmental discrepant gas pattern of the small intestine.

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

The presence of eccentric gas within the small intestine may be an incidental finding; however, corrugation as well as plication of the small intestine cannot be ruled out and functional ileus as well as mechanical ileus with linear foreign material remains a potential with the pertinent radiographic findings. Hence, abdominal ultrasound or radiographic recheck are recommended in this patient for further definition if not performed already.
