COMPUTED TOMOGRAPHIC STUDY OF THE FRONT LIMBS

SEX

Plain and post contrast studies of the elbows, carpi, and left shoulder available for review.

MN

COMPUTED TOMOGRAPHIC FINDINGS

Carpi

AGE

2 Years

Mild soft tissue swelling is seen dorsal to the left antebrachiocondylar joint. There is a mild amount of smooth new bone on the distal and cranial contour of the left radius. 2.5mm and 1.0mm sized structures are seen dorsal to the antebrachiocondylar joint. No evidence of subluxation or fracture of the carpal bones is seen.

INTERPRETED BY

Nele Eley, DVM
 Dr. med. Vet. DipECVDF

The metacarpophalangeal joints present within normal limits.

The right carpus presents within normal limits.

HOSPITAL NAME

Mountain West
 Veterinary Hospital

Elbows

Both elbows present within normal limits. No fragmentation or fissuring of the medial coronoid process is seen. The subchondral bone of the medial humeral condyles is even and smooth in both elbows.

Minimal osseous remodeling of the periarticular margins is noted in the left elbow.

REFERRING VET

Burton

There is no significant joint incongruity.

Left Shoulder

INVOICE

51733

The left shoulder presents within normal limits. No evidence of osteochondritis or osteoarthritic changes is seen.

COMPUTED TOMOGRAPHIC DIAGNOSIS

DATE

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The CT findings suggest potential for left carpal hyperextension injury with mild left antebrachio-carpal joint osteoarthritis. The small, isolated structures may represent avulsion as well as dystrophic mineralization. Rule out carpal hyperextension by means of clinical correlation. In case of doubt, stressed radiographs could be obtained.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
