

**PATIENT**

Georgia Von Reyn

**PRESENTING CLINICAL SIGNS**

He has intermittent lameness With biceps on stretch and rotation of the limb there is clunking at the joint Sore with biceps stretch MSI angle LTL 25, RTL 15

**SPECIES**

Canine

**ULTRASONOGRAPHIC FINDINGS****Left Shoulder**

Mild generalized remodeling of the left supraspinatus tendon is seen. The left supraspinatus tendon measures 5.5mm in thickness. There appears to be mild deviation of the biceps tendon; however, the biceps tendon presents no evidence of echoarchitectural changes. Mild effusion is present within the bicipital synovial sheath. The intertubercular groove is even and smooth. Mild osseous remodeling of the periarticular margins is seen. Part of the medial glenohumeral ligament is seen and presents mild even thickening. The files supposedly showing laxity of the joint are unfortunately 2 still images.

**BREED**

Havanese

**SEX**

MN

**Right Shoulder**

The right supraspinatus tendon measures 5mm in thickness and presents no deviation from its internal echoarchitecture. Mild bicipital sheath effusion is seen with no echoarchitectural changes within the biceps tendon. Mild osseous remodeling of the periarticular margins is noted. The infraspinatus tendon presents within normal limits.

**AGE**

8

**ULTRASONOGRAPHIC DIAGNOSIS**

- Desmopathy of the left medial glenohumeral ligament with mild periarticular bone remodeling and mild supraspinatus tendinopathy.
- Mild bilateral tendon sheath effusion of the biceps likely translocated from the joint.

**INTERPRETED BY**

Nele Eley, DVM  
Dr. med. Vet. DipECVDI

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

The ultrasonographic changes in the medial compartment of the left shoulder are subtle yet they support the potential for instability within the left shoulder. This may be conformational due to dysplasia and/or secondary to medial instability. The mild echoarchitectural remodeling of the supraspinatus tendon with early biceps impingement is of rather questionable significance at this point.
