

**PATIENT**

Beaugard Essex

PRESENTING CLINICAL SIGNS

Intermittent unidentified lameness. Lyme snap negative. Crepitus in Right elbow appreciated.

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE SHOULDERS & ELBOWS

Mediolateral views of both shoulders, mediolateral and craniocaudal views of both elbows, and craniocaudal view of the right elbow totaling 5 images available for review.

BREED

Mixed Breed

RADIOGRAPHIC FINDINGS**Right Shoulder**

Mild heterogeneity and increased opacity of the intertubercular groove of the biceps tendon is seen in the right shoulder. There is mild osseous remodeling of the caudal humeral head. No evidence of subchondral bone defects is seen.

SEX

Neutered Male

Left Shoulder

Mild osseous remodeling level with the intertubercular groove of the biceps tendon appears to be present. A clavicular remnant is seen.

AGE

6 Years

Right Elbow

Blurring and decreased opacity of the cranial contour of the medial coronoid process is seen. There is a radioulnar step formation and subtrochlear notch sclerosis of the ulna. The periarticular margins present a moderate to severe amount of osteophytes.

INTERPRETED BYNele Eley, DVM
Dr. med. Vet. DipECVDI**Left Elbow**

Decrease in opacity of the cranial contour of the medial coronoid process is seen. However, there is no obvious cranial contour blurring. No evidence of periarticular osteophytes is noted. There appear to be no subchondral bone defects.

HOSPITAL NAMEBelvedere Veterinary
Center**RADIOGRAPHIC DIAGNOSIS**

- Medial coronoid pathology with moderate secondary osteoarthritis of the right elbow.
- Osseous remodeling of the intertubercular groove of the biceps tendon in both shoulders.

REFERRING VET

Lawrence Eden, DVM

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study reveals moderate right elbow osteoarthritis secondary to medial coronoid pathology. Consider CT and arthroscopy of the right elbow.

INVOICE

51880

The radiographic changes of the shoulders are mild and not necessarily of clinical significance. However, they may be concurred by biceps tenosynovitis.
