SPECIES

Feline

Abnormal PE/Chem/CBC/UA Results: ALT : 145 (6- 109)

RADIOGRAPHIC STUDY OF THE ABDOMEN

Right/left lateral and ventrodorsal views totaling 3 images available for review.

BREED

Domestic Short Hair

RADIOGRAPHIC FINDINGS

The surrounding bony structures are within normal limits.

SEX

FS

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

AGE

5 Years

The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic tail is not seen.

INTERPRETED BY

Nele Eley, DVM
Dr. med. Vet. DipECVDI

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

The stomach is in its anticipated position and presents normal content.

HOSPITAL NAME

Brittany Glen Animal
Hospital

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

REFERRING VET

Dr. Boktor

RADIOGRAPHIC DIAGNOSIS

- Normal radiographic presentation of the gastrointestinal tract.

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

INVOICE

53038

No radiographic signs of mechanical ileus are found. There is no evidence of plication, radiopaque foreign material, or dilation of the small intestine. Trichobezoar / hairball and other nonradiopaque foreign material cannot be ruled out. However, functional ileus appears more likely based on the radiographic presentation and further definition by means of abdominal ultrasound could be considered in case of persisting clinical signs and depending on the correlation with the clinical status and laboratory workup.
