

**PATIENT**

Oreo Hernandez

PRESENTING CLINICAL SIGNS

Frequent sneezing for last month, no known allergies

SPECIES

Feline

COMPUTED TOMOGRAPHIC STUDY OF THE HEAD

Plain and post contrast studies are available for review.

BREED

DSH

COMPUTED TOMOGRAPHIC FINDINGS

The brain presents no deviation from normal anatomy and symmetry. The grey and white matter distinction and the neuroparenchymal attenuation are as expected. The distribution of contrast enhancement is within normal limits throughout the parenchyma and meninges. The ventricular system is non-dilated and within the limits of the expected volume and symmetry.

SEX

MN

Thin and smoothly folded conchae and turbinates with even smooth mucosal lining. The osseous lining of the nasal cavities is intact.

AGE

5

Both temporomandibular joints present congruent joint spaces with even subchondral bone surfaces and are considered within normal limits.

Both tympanic bullae are aerated, the mucosal lining is not seen, the bony wall is smooth and thin. The external auditory meatuses present within normal limits.

INTERPRETED BYNele Eley, DVM
Dr. med. Vet. DipECVDI

The submandibular and medial retropharyngeal lymph nodes are small and elongated with a normal short-to-long-axis-ratio is < 0.5 , the attenuation and contrast enhancement pattern is uniform.

The salivary glands present within normal limits.

HOSPITAL NAMEScottsdale Veterinary
Clinic

The visible dentition is within normal limits.

COMPUTED TOMOGRAPHIC DIAGNOSIS

- Normal CT presentation of the nasal cavities and paranasal sinuses.

REFERRING VET

Dr. D'Monte

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The nasal cavities and paranasal sinuses present within normal limits. No evidence of current inflammation, foreign material, turbinate destruction, soft tissue mass, or relevant dental disease is seen. The CT signs of acute rhinitis such as allergic, irritant, or infectious may lag behind the clinical course of the disease and further definition by means of rhinoscopy or CT recheck could be considered in case of persisting clinical signs.
