

PATIENT PRESENTING CLINICAL SIGNS

Teddy Meier Presented for routine wellness exam. Suspected cranial abdominal mass on abdominal palpation and x-ray. O reports a recent episode of significantly increased panting.
 Abnormal PE/Chem/CBC/UA Results: Blood results pending

SPECIES RADIOGRAPHIC STUDY OF THE THORAX & ABDOMEN

Canine Right/left lateral and ventrodorsal views of the thorax and single lateral view of the abdomen totaling 4 images available for review.

BREED RADIOGRAPHIC FINDINGS

Golden Retriever **Thorax**

SEX A 7.0 cm sized round soft tissue mass is seen in the right caudoventral thoracic wall reportedly a lipoma.

Male Neutered Mild redundancy of the dorsal tracheal ligament is noted.

AGE There are multiple age related incidental pulmonary osteomas. No evidence of pulmonary nodules or masses is seen. There is mild diffuse increase in interstitial opacity.

11.75 Years The vertebral heart score is 9.

INTERPRETED BY Abdomen

Nele Eley, DVM Note the presence of gastric aerophagia in a postprandial stomach. A mild amount of gravel is seen in the gastric pylorus.
 Dr. med. Vet. DipECVDI

HOSPITAL NAME A large amount of fat appears to be present in the abdomen, especially in the region of the falciform ligament.

Long Valley Animal Hospital Pinpoint mineral opaque foci superimpose onto the urinary bladder and likely represent artifacts.

RADIOGRAPHIC DIAGNOSIS

- REFERRING VET**
- Soft tissue mass of the right ventral thoracic wall reportedly lipoma.
 - Redundancy of the dorsal tracheal ligament.
 - Mild diffuse interstitial lung pattern.
- Russell Earl

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

INVOICE The radiographic study reveals no evidence of an abdominal mass effect, organomegaly, or effusion. Abundance of peritoneal fat appears to be present.
 53436

DATE Differential diagnosis for the mild diffuse interstitial lung pattern includes normal age related increase in interstitial opacity versus emerging interstitial lung disease such as pneumonia, pneumonitis, edema, and less likely fibrosis. Correlate with the clinical signs.
