

PATIENT PRESENTING CLINICAL SIGNS

Samson Choy Long standing hx of occ. wheezing/hacking as if to produce hairball (suspect O is observing coughing). Recently had an increased in frequency of episodes, every 10-15 minutes on Sunday. Otherwise doing well at home

SPECIES Abnormal PE/Chem/CBC/UA Results: NSF on PE beyond being slightly overweight

Feline **RADIOGRAPHIC STUDY OF THE THORAX**

Right/left lateral and ventrodorsal views totaling 3 images available for review.

BREED RADIOGRAPHIC FINDINGS

DSH The surrounding bony structures are within normal limits.

SEX The extrathoracic soft tissues present homogeneous without abnormalities.

MN The heart is of normal size and shape and there is no evidence of cardiac chamber or vascular enlargement. The pulmonary vasculature is within normal limits.

AGE The cranial mediastinum presents the expected soft tissue opacity. The mediastinal width is less than twice the width of the vertebral column at the same level.

1 Year Mild esophageal aerophagia is noted.

INTERPRETED BY The trachea is normal in diameter and presents the anticipated course. The luminal outline of the trachea is smooth.

Nele Eley, DVM
Dr. med. Vet. DipECVDF

The degree of pulmonary inflation is moderate. A moderate generalized bronchial lung pattern with marked peribronchial cuffing is seen with even distribution throughout the lung.

HOSPITAL NAME The diaphragm is well delineated with even surface and the expected mild cranial bulging of the diaphragmatic cupola.

Boca Park Animal Hospital The stomach is post-prandial.

REFERRING VET RADIOGRAPHIC DIAGNOSIS

- Hill • Moderate generalized active lower airway pattern.

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

INVOICE The radiographic findings are compatible with chronic active lower airway disease. The differential diagnosis includes allergic lower airway syndrome as well as infectious bronchitis including viral, bacterial, parasitic, or protozoal. Further definition would require lower airway sampling which could be considered and weighed against a clinical trial of treatment for feline asthma.
