

PATIENT

Georgia Wojcicki

PRESENTING CLINICAL SIGNS

Georgia is here today for a CT Scan after having been sent over by Dr. Ward last Friday 09/09/22 for further evaluation of fluid in the abdomen. Ultrasound revealed an undefined region in the abdomen wall cranial to the bladder and where fluid was present. Georgia has a history of anorexia, and not drinking much.

SPECIES

Canine

COMPUTED TOMOGRAPHIC STUDY OF THE ABDOMEN

Plain and post contrast studies available for review.

BREED

Labrador Mix

COMPUTED TOMOGRAPHIC FINDINGS

The serosal fat presents normal attenuation behavior. There is no evidence of peritoneal effusion or peritonitis.

SEX

FS

Both kidneys present within normal limits for size, shape and organ architecture. After contrast administration a bilaterally symmetric and uniform nephro- and pyelogram is noted.

The adrenal glands are within normal limits for size, shape and organ architecture.

AGE

5 Years

Both liver and spleen present with normal shape, even surface, uniformly attenuating parenchyma and homogeneous contrast enhancement, unremarkable.

The pancreas is evenly contoured, the pancreatic parenchyma is homogeneous and presents uniform contrast enhancement.

INTERPRETED BY

Nele Eley, DVM
Dr. med. Vet. DipECVDI

The position, delineation, wall and content of the gastrointestinal tract are considered within normal limits throughout.

The bony and surrounding soft tissue structures reveal no abnormalities.

The patient is obese.

COMPUTED TOMOGRAPHIC DIAGNOSIS

- Normal CT findings of the abdomen.

REFERRING VET

Dr. Young

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

At the time of the CT examination, there is no free peritoneal fluid and no fluid filled cavitory lesion noted within the abdomen. The abdominal organs present within age related normal limits. No evidence of organomegaly, abdominal mass effects, peritonitis, or lymphadenomegaly is noted.

INVOICE

53995

Feel free to reach out to me in case you want to submit ultrasound images of the undefined region in the abdomen with structural abnormality as described in the patient history, so I can compare and cross-reference between the ultrasound and CT images.
