INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The appearance of the pancreas is consistent with pancreatitis.

IMAGING PERFORMED BY

Cathleen Whitcraft, DVM

Etiologies for the enteropathy would be inflammatory bowel disease, parasitic enteritis, granulomatous enteritis, dietary hypersensitivity, and emerging lymphoma.

HOSPITAL NAME

Further assessment would be fecal analysis, fPL/PSL assay, cobalamin assay, and endoscopy of both the upper and lower GI tract with biopsies.

Craig Road Animal Hospital

REFERRING VET

Cathleen Whitcraft, DVM

Specific therapy would be dependent on an etiological diagnosis. Symptomatic management would be novel protein/hypoallergic diet, course of fenbendazole, cobalamin assay, and possibly prednisolone.
