PRESENTING CLINICAL SIGNS

History: Distended abdomen.

Physical Examination: N/A.

Urinalysis: N/A

CBC: N/A.

Serum Biochemistry: N/A.

Radiographic Findings: N/A.

ULTRASONOGRAPHIC EXAMINATION OF THE ABDOMEN

Urinary System

Full urinary bladder with a normal thickness (0.3 cm) and appearance of the wall. Normal anechoic urine with no sediment or uroliths evident.

Normal proximal urethra and iliac blood vessels.

Normal iliac lymph nodes. Ureters not visualized.

Normal renal size (left 4.8 cm, right 6.2 cm), echogenic appearance, cortico-medullary differentiation, pelvis, and capsule.

Reproductive System

N/A.

Adrenal Glands

Normal shape, echogenic appearance, position, and size. Left 0.54 cm.

Spleen

Normal size and echogenic appearance. Smooth homogenous parenchyma, smooth curvilinear capsule, and normal vasculature. No evidence of inflammatory, neoplastic, infarction, or infiltrative changes noted.

Liver

Normal size, echogenic appearance, and portal markings. No nodules or masses evident. Full gall bladder containing normal anechoic bile. Normal thickness (0.1 cm) and appearance of the gall bladder wall. Normal bile duct.

Gastrointestinal

Normal appearance of the stomach, duodenum, small intestine, ileo-cecal junction, and colon with no loss of layering, normal wall thickness (stomach 0.46 cm, duodenum 0.48 cm, jejunum 0.35 cm) and peristaltic activity, and no distension of the lumen.

Pancreas

Normal size and echogenic appearance. Normal echogenic appearance of the mesentery and fat surrounding the pancreas.

Free Abdomen

No mesenteric lymphadenomegaly.

No ascites.

Large (± 15 cm) hyperechoic mass that extends from the right caudal liver lobe to the urinary bladder and displacing other organs but not compressing them.

ULTRASONOGRAPHIC FINDINGS

Primary findings:

- Intra-abdominal lipoma.

Secondary findings:

- None.

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The appearance of the mass is consistent with a lipoma.

Further assessment would be FNA cytology of the mass.

Specific therapy would be surgically removal of the lipoma.
