

	PRESENTING CLINICAL SIGNS
PATIENT	
Marshmellow Dixit	History: vomiting, not eating for 1 day. Abnormal PE/Chem/CBC/UA Results: bw is unremarkable
SPECIES	RADIOGRAPHIC STUDY OF THE ABDOMEN
Feline	Radiographs of the abdomen in three imaging planes are provided for review.
	RADIOGRAPHIC FINDINGS
BREED	The surrounding bony structures are within normal limits.
DSH	No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin. The serosal detail is maintained throughout the peritoneal and retroperitoneal space.
SEX	The liver is appropriate in position, size and presents uniform opacity.
Spayed Female	The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.
AGE	Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.
3 Years	The stomach is in its anticipated position and is empty.
INTERPRETED BY	The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.
Sebastian Schaub, DVM Dr. med. vet. DipECVDI	The colon is seen in the expected position and presents with appropriate content.
HOSPITAL NAME	RADIOGRAPHIC DIAGNOSIS
St. Catharines AH	<ul style="list-style-type: none">• Empty stomach• Normal abdomen
	INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS
REFERRING VET	The empty stomach is a sequela to the described hyporexia & vomiting. There is no evidence of radiopaque foreign material or signs for gastrointestinal mechanical obstruction. Recommend empirical management by the means of antiemetic drugs and gastric protection therapy. If clinical signs are refractory to therapy, recommend follow up radiographs or a complete abdominal ultrasound examination.
Dr. Boctor	
INVOICE	The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.
