

PATIENT

Pixie Robbs

PRESENTING CLINICAL SIGNS

limping on RF , sever pain response when pressure applied on right elbow joint
Abnormal PE/Chem/CBC/UA Results: Elevated ALP, ALT

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE RIGHT ELBOW & CARPAL JOINT

A complete set of radiographs of the right elbow and carpal joint is provided for review.

BREED

Mini Poodle

RADIOGRAPHIC FINDINGS

No side markers are present.

SEX

Female Spayed

The surrounding soft tissue structures are within normal limits.

The osseous and soft tissue structures of the carpal joint are within normal limits.

AGE

13 Years

RADIOGRAPHIC DIAGNOSIS

- Mild degenerative osteoarthritis right elbow joint
- Normal right carpal joint

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The right elbow joint presents with evidence of mild degenerative joint disease and might be a source for the clinical signs.

No abnormalities of the carpal joints are appreciated.
