

PATIENT PRESENTING CLINICAL SIGNS

Saber Marr
SPECIES History: Per owner patient had an accident 6-7 weeks ago - got wrapped up in the carpet and hit a pocket door. Started limping after that. Per owner it's her left front leg at first, she was limping and then got a little better - now is almost always limping. (10/9/2021) Since Saber's visit on 10/9/2021 she was on Rimadyl and Gabapentin once the owner ran out of medications, they noticed Saber get up and whimper a few times.

Canine
 Abnormal PE/Chem/CBC/UA Results: No apparent pain elicited on exam.

BREED RADIOGRAPHIC STUDY OF THE FRONT LIMBS AND PELVIS

Siberian Husky A complete set of radiographs of the front limbs and the pelvis is provided for review.

SEX RADIOGRAPHIC FINDINGS

Spayed Female
 A small (<2 mm) mineralized body is seen at the caudal aspect of the right glenoid fossa of the scapula. Both shoulder joints present smooth osseous margins and without abnormalities of the surrounding soft tissue structures.

AGE

3 Years 3 Months
 The elbow joints present smooth osseous margins and the contour of the medial coronoid process is well defined with margins, unremarkable.

The carpal joints present well-defined margins of the subchondral bone, unremarkable.

INTERPRETED BY

Sebastian Schaub,
 DVM Dr. med. vet.
 DipECVDI

Both coxofemoral joints present moderate osteophyte new bone formation. The acetabular groove bilaterally is shallow and the center of the femoral heads is lateral to the dorsal acetabular rim.

RADIOGRAPHIC DIAGNOSIS

HOSPITAL NAME

Elizabeth AH

- Degenerative osteoarthritis coxofemoral joints, due to marked hip dysplasia
- Isolated ossification center right glenoid fossa, incidental
- Normal elbow joints bilaterally
- Normal carpal joints bilaterally

REFERRING VET

Leon Anderson, DVM

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The front limbs present without clinically relevant pathology.

There is advanced degenerative joint disease of the coxofemoral joints due to hip dysplasia which can be a source for pain and lameness in the hind limbs.
