

PATIENT

Billy Borja

SPECIES

Canine

BREED

Poodle Mix

SEX

Neutered Male

AGE

8 Years

WEIGHT

11 Pounds

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

IMAGING PERFORMED BY

Dr. Tudor Suci

HOSPITAL NAME

Animal Clinic of
Queens

REFERRING VET

Dr. Tudor Suci

INVOICE

35717

DATE

11/29/25

PRESENTING CLINICAL SIGNS

History: In the last 3 days Billy's appetite has been decreased (approximately 50% less), but the water intake is normal. His belly has been hard since Tuesday 11/25, and he is tensing up when the owners are touching his abdomen. His energy level is low, today he was slow during the walk (usually he is very energetic), and he didn't want to use the stairs. Also, he was limping with his left hind leg. He appeared to be very anxious today, staying very close to the owner. He yelped when he was picked up. Billy has a history of femoral head ostectomy (bilateral).

Abnormal PE/Chem/CBC/UA Results: High GGT (22), high total bilirubin (1.6) (on abdominal POCUS there is an early stage biliary mucocele). Low ionized calcium 1.11 (1.13-1.42)

RADIOGRAPHIC STUDY OF THE STIFLE JOINTS

A complete set of radiographs of the stifle joints is provided for review; radiographs are provided in JPEG file format.

RADIOGRAPHIC FINDINGS

Both stifle joints present smooth margins of the periarticular bones. The patella of both stifle joints is in situ. The stifle joints present no evidence of an overt intracapsular soft tissue swelling.

RADIOGRAPHIC DIAGNOSIS

- Normal stifle joints

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the stifle joints presents without abnormalities – be aware that the image contrast in JPEG file format is limited and signs of mild joint effusion can be missed.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
