

**PATIENT**

Sharky Goytia
Mendez

PRESENTING CLINICAL SIGNS

Pet presented 11/2/2022 for not eating well and diarrhea. Patient is on Royal Canin Hepatic can diet, but owner is giving him pumpkin and rice. Sharky has a hepatic diagnostic.

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE ABDOMEN

Radiographs of the abdomen in two imaging planes are provided for review.

BREED

Yorkshire Terrier

RADIOGRAPHIC FINDINGS

The surrounding bony structures are within normal limits.

SEX

Neutered Male

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

The serosal detail is generalized decreased.

The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity.

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

AGE

12 Years

The stomach is in its anticipated position and presents normal content.

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

RADIOGRAPHIC DIAGNOSIS**HOSPITAL NAME**

Alejandrino Animal
Hospital

- Normal abdomen

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the abdomen is considered normal. However, due to the lack of abdominal serosal detail - considered as a sequela to the nutritional status and radiographic algorithm, rather than due to underlying mild peritoneal effusion - more subtle lesions can be missed. If not done so yet, recommend complementing workup by blood work including cpl to rule out underlying pancreatitis. An abdominal ultrasound would be beneficial for further assessment of the abdominal organs.
