

PATIENT

Bear Macomber

PRESENTING CLINICAL SIGNS

Dog ate rubber spatula end on 12/4/21. Dog is eating & having normal BM's but has not passed spatula in stool or vomiting.

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE ABDOMEN

Radiographs of the abdomen in two orthogonal imaging planes are provided for review.

BREED

Retriever Labrador

RADIOGRAPHIC FINDINGS

Moderate spondylosis formation is seen along the cranial lumbar spine. The pictured parts of the right coxofemoral joints present marked osteophyte new bone formation.

SEX

Male Neuter

In the subcutaneous tissue of the left abdominal wall, a fat opaque ovoid shaped mass is visible, measuring approximately 10 x 4 cm in size.

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

The liver is appropriate in position, size and presents uniform opacity.

AGE

14 Years

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

The stomach is in its anticipated position and presents normal content.

HOSPITAL NAME

Blandford Animal
Hospital

The small intestinal loops are of even diameter and non-dilated, a small amount of gas & ingesta is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

REFERRING VET

Hazel Holman

RADIOGRAPHIC DIAGNOSIS

- Marked degenerative osteoarthritis right coxofemoral joint
- Lipoma left abdominal wall
- Spondylosis deformans

INVOICE

48812

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study presents without pathology of the gastrointestinal tract, there is no evidence of radiopaque foreign material or signs for gastrointestinal mechanical obstruction.
