Kobe Strebel

PRESENTING CLINICAL SIGNS

acute onset limping after falling

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE ABDOMEN & STIFLE JOINTS

A complete set of radiographs of the abdomen and the stifle joints is provided for review.

BREED

Retriever

Abdomen

The surrounding bony structures are within normal limits.

SEX

Male

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

The liver is appropriate in position, size and presents uniform opacity.

AGE

2 Years

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.

INTERPRETED BYSebastian Schaub, DVM
Dr. med. vet. DipECVDI

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

The stomach is in its anticipated position and presents normal content.

HOSPITAL NAMERockaway Animal
Hospital

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

REFERRING VET

Dr. Maniar

Stifle joints

Both stifle joints present smooth osseous margins and without evidence of intracapsular swelling, unremarkable.

RADIOGRAPHIC DIAGNOSIS

- Normal abdomen
- Normal stifle joints

DATE

12-8-21

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the abdomen and the stifle joint presents without abnormalities. The presumptive diagnosis for the acute lameness with the traumatic history can be contusion or distortion. Consider a clinical trial with NSAIDs and rest; re-evaluating the patient if clinical signs are refractory to therapy is recommended.

PATIENT

Kobe Strebel

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
