

PATIENT PRESENTING CLINICAL SIGNS

Fulton Paton vomiting and anorexic for 3 days
Abnormal PE/Chem/CBC/UA Results: unremarkable

SPECIES RADIOGRAPHIC STUDY OF THE ABDOMEN

Canine Radiographs of the abdomen in three imaging planes are provided for review.

RADIOGRAPHIC FINDINGS

BREED

The surrounding bony structures are within normal limits.

Mastif Mix

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

SEX

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

Male Neuter

The liver is appropriate in position, size and presents uniform opacity.

AGE

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.

20 Months

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

The stomach is in its anticipated position and presents normal content.

HOSPITAL NAME

St. Catherine's Animal
Hospital

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

RADIOGRAPHIC DIAGNOSIS

REFERRING VET

- Normal abdomen

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

INVOICE

50298

The radiographic study presents no abnormalities, explaining the vomiting. There is no evidence of radiopaque foreign material or signs for gastrointestinal mechanical obstruction. The presumptive diagnosis is gastritis and empirical management is recommended. If clinical signs are refractory to therapy, recommend follow up radiographs or a complete abdominal ultrasound examination; in some cases, a high ileus may lack classical radiographic signs of mechanical obstruction.
