

**PATIENT PRESENTING CLINICAL SIGNS**

River Every Presented for limping on and off. Radiology report: distal left tibial neoplasia. CT for Metastases check in thorax and abdomen vs other abnormalities.

**SPECIES COMPUTED TOMOGRAPHY OF THE THORAX & ABDOMEN**

Canine A high resolution pre- and post-contrast CT study of the thorax and abdomen is provided for review.

**BREED COMPUTED TOMOGRAPHIC FINDINGS**

Mastiff Thorax

The bony and surrounding soft tissue structures are within normal limits.

**SEX** The sternal, cranial mediastinal and tracheobronchial lymph nodes are small elongated with a normal short-to-long-axis-ratio is < 0.5, the attenuation and contrast enhancement pattern is uniform and considered within normal limits.

Female The cardiovascular structures including the pulmonary vasculature are within normal limits.

**AGE** The bronchial tree presents with regular branching and tapers uniformly towards the periphery as expected, the bronchial walls are thin and smooth. The bronchus-to-artery ratio is within normal limits.

3 Years, 8 Months The lung parenchyma presents the expected architecture and attenuation behavior.

**INTERPRETED BY** Small incidental gas pockets are seen within the esophageal lumen, there is no evidence of abnormal dilation.

Sebastian Schaub, DVM  
Dr. med. vet. DipECVDI

Abdomen

**HOSPITAL NAME** The serosal fat presents normal attenuation behavior. There is no evidence of peritoneal effusion or peritonitis.

Taconic Route 202 24  
Hour Veterinary  
Center

Both kidneys present within normal limits for size, shape and organ architecture. After contrast administration a bilaterally symmetric and uniform nephro- and pyelogram is noted.

The adrenal glands are within normal limits for size, shape and organ architecture.

**REFERRING VET** Both liver and spleen present with normal shape, even surface, uniformly attenuating parenchyma and homogeneous contrast enhancement, unremarkable.

Dr Mary Wallace

The pancreas is evenly contoured, the pancreatic parenchyma is homogeneous and presents uniform contrast enhancement.

**INVOICE** The position, delineation, wall and content of the gastrointestinal tract are considered within normal limits throughout.

56556 The most caudal aspect of the abdomen is cropped by the field of view.

**DATE** The bony and surrounding soft tissue structures reveal no abnormalities.
