

PATIENT

Moriarty Foster

PRESENTING CLINICAL SIGNS

Eating More and weight loss. FIV positive diagnosed as a kitten
Abnormal PE/Chem/CBC/UA Results: all wnl but Low neutrophils high cholesterol

SPECIES

Feline

RADIOGRAPHIC STUDY OF THE THORAX & ABDOMEN

An overview study including the thorax and abdomen in two imaging planes is provided for review.

BREED

Domestic Shorthair

RADIOGRAPHIC FINDINGS

Thorax

The surrounding bony structures are within normal limits.

SEX

Female Spayed

The extrathoracic soft tissues present homogeneous without abnormalities.

The heart is of normal size and shape, there is no evidence of cardiac chamber or vascular enlargement. The pulmonary vasculature is within normal limits.

AGE

8 Years

The trachea is normal in diameter and presents the anticipated course. The luminal outline of the trachea is smooth.

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

The bronchial tree presents with thin walls and tapers uniformly towards the periphery as expected.

The lung parenchyma presents the expected architecture and opacity; the intrapulmonary vascular branching is seen up to the third order lung vessels.

HOSPITAL NAME

St. Catherine's Animal
Hospital

The diaphragm is well delineated with even surface and the expected mild cranial bulging of the diaphragmatic cupola.

Abdomen

The surrounding bony structures are within normal limits.

REFERRING VET

Dr. Mena Abdelsayed

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

INVOICE

50955

The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity.

DATE

3-15-22

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

The stomach is in its anticipated position and presents normal content.

PATIENT

Moriarty Foster

The small intestinal loops are of even diameter and mildly dilated by gas.

The colon is seen in the expected position and presents with appropriate content.

SPECIES

Feline

- Normal thorax
- Normal abdomen

RADIOGRAPHIC DIAGNOSIS

BREED

Domestic Shorthair

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the thorax and abdomen presents without abnormalities. If underlying endocrinological disorders can be ruled out, complementing workup by an abdominal ultrasound examination might be beneficial.

SEX

Female Spayed

AGE

8 Years
