**REFERRING VET**

Dr. Corinna Gorgon

**RADIOGRAPHIC DIAGNOSIS**

- Normal abdomen stapler clamp in the descending colon

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

**INVOICE**

50755

The stomach is moderately distended by what is considered as chymus – check if the patient was fed prior to the radiographs. There are no signs for gastrointestinal mechanical obstruction. If clinical signs are refractory to empirical management, recommend follow up radiographs after fasting the patient for 12h.
